# RAB®

A22

FIELD ADJ.

SELECTABLE BEAM

Interchangeable optics with quality you can trust!

A22—with selectable CCT, wattage, and distribution type.

Changing optics has never been easier.

Available in a wide range of models—everything from 50W to 320W—the A22 comes with interchangeable optics that give you the flexibility to change output in the field. IES Type II, III, IV, and V distributions are all available.

All-in-one maximized versatility.

When you need one fixture to do it all, the A22-150X delivers. In addition to boasting three selectable wattages and color temperatures, and a twistlock photocell, the 150X includes three interchangeable lenses (Types III, IV, V) and an adjustable universal pole mount.

Innovative door design opens/closes with a quick twist and secures the lens against high winds.

Sensors and controls.

All A22 models come standard with a NEMA 7-pin receptacle but can also be ordered with an integrated microwave sensor to help qualify for additional utility rebates. Standard and Lightcloud twistlock photocells can also be purchased as accessories.

Light an entire site.

Out of the box, the A22 includes an adjustable, universal pole mount, but several other mounting accessories are offered so that it can be used throughout various areas for one unified look.
