The most flexible FlexFlood ever.

The FXLED just got an upgrade that maximizes versatility both on the shelf and in the field: 3 sizes, 11 wattages, 2 mounting options, and 2 CCTs.

It's dropped a few sizes.

The new FXLED is far lighter and smaller than our original series—less than half the size! It also weighs significantly less, making it a much more sustainable, eco-friendly product. Less materials, less packaging, less energy to manufacture, less cargo space, less fuel to transport... it all adds up!

Stay in control.

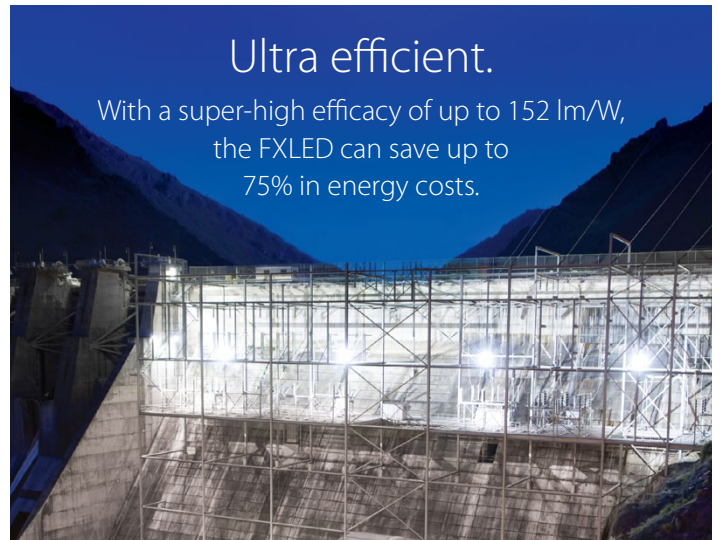

The FXLED is available with a 7-pin receptacle that's perfect for use with RAB's standard twistlock photocell or our smart, Lightcloud-enabled twistlock photocell*

* Standard Twistlock (120-277V): [RPCT](#)
 Standard Twistlock (480V): [RPCT-480](#)
 Lightcloud-Enabled Twistlock (120-277V; requires Lightcloud Gateway or Hub): [LCTWIST/K](#)

Ultra efficient.

With a super-high efficacy of up to 152 lm/W, the FXLED can save up to 75% in energy costs.
