Smooth light distribution.

High-reflectance finish and white diffusion lens softens light and reduces glare, unlike traditional prismatic lenses.

Designed to look good and safe to install.

Molded end caps and post-painted steel ensure rounded corners and smooth edges, making GUS safe to handle, while giving it a refined look.

Joiner brackets

A joiner bracket accessory is available for side-entry or continuous-run mounting.

Mounting options.

GUS can be surface mounted or mounted to a junction box. It can also be mounted in a variety of other ways, including chains, pendants and v-hooks (provided by others).

Lightcloud® Blue enabled.

Available with factory-installed Lightcloud Blue compatibility, for use with our wireless, Bluetooth mesh control system.
