

Let one lamp do the work of many!

CCT-selectable compact lamps maximize flexibility in the field.

Flexibility that's got you covered.

Our portfolio of CCT-selectable compacts crams a ton of features into one lamp, drastically reducing the number of stocking SKUs needed!

Up, Down or Horizontal

Commonly used styles like PLC & PLT come with 360° omnidirectional light distribution and a frosted lens; the lamp can be installed either vertically or horizontally, creating a more uniform and softer lighting effect equivalent to fluorescent lamps.
