

# RAB®

The classic glass-front wall pack...refined.  
W34 — adjustable, sustainable, intelligent design.

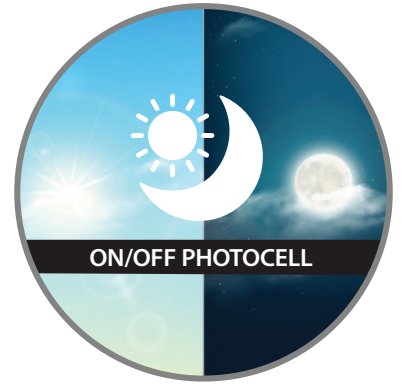

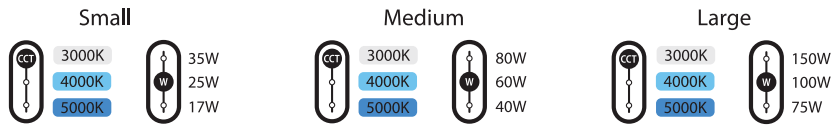

## Designed more sustainably.

The W34 is designed to mimic traditional, glass-front wall packs, but with an ultra-low profile that reduces production materials and overall weight.

# A field-adjustable upgrade.

The W34 now comes with 3-way field adjustability that maximizes flexibility on the shelf and in the field. With three selectable wattages, three CCTs, and an integrated on/off photocell, each W34 is 18 fixtures in 1!

## Simplified installations, intelligent design.

The W34 is designed with tethers that support the lens during installs, so you can keep both hands free.

Clamps on the top of the W34 lock the lens in place and compress the gasket for a secure closure.

The tiered reflector drives light down instead of out and reduces uplight.

All models have weep holes at bottom of the housing that drain moisture and keep lenses from fogging up.

## Ordering Matrix

| Family      | Size/Wattage  | Color Temperature                        | Finish       | Voltage                       | Options                    |
|-------------|---|--|--------------|-------------------------------|----------------------------|
| W34         |   |  |              |                               |                            |
| S<br>M<br>L | Small, 35/25/17W<br>Medium, 80/60/40W<br>Large, 150/100/75W | Blank 3000K/4000K/5000K Field Adjustable | Blank Bronze | Blank 120-277V, 0-10V dimming | Blank Integrated Photocell |
