# Lightcloud®

Outdoor Applications

All Lightcloud Blue-enabled products will instantly connect to the systems app via Bluetooth mesh, getting you up and running in minutes. No Gateway or Hub required.

Features

No Gateway or Hub required: Using Bluetooth Mesh, each device communicates with the others to extend the range further.

**Rapid Provisioning:** Pair in groups of up to 100 fixtures simultaneously in minutes. Save time and labor.

Wireless Control: Full wireless control for on/off, dimming, and color temperature for tens of thousands of devices

Schedules: Create automations for individual and groups of lights.

Occupancy Sensor: Integrated occupancy sensor for customizable motion control.

Daylight Harvesting: Supports daylight harvesting for indoor and outdoor fixtures with integrated and standalone options.
