New, improved, and field adjustable.

Available in square and round forms, bronze and white finishes, and two sizes, the PORTO now boasts field-adjustable wattage and CCT. With output options from 30W to 110W, PORTO adapts to your exact needs.

Sleeker than ever.

With a revolutionary low-profile design standing just over 4" from the ceiling, PORTO maximizes clearance for SUVs and roof racks, while maintaining powerful illumination that includes 14% uplight. Both sizes are also each 4" smaller than PORTO's first generation!

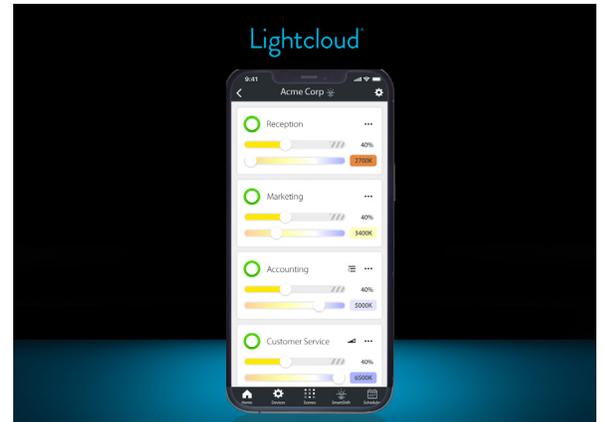

Versatility that's built to last.

With vandal-resistant construction, a high-transmission polycarbonate lens, and an IP65 rating, PORTO is built to stand up to the toughest garages. It accommodates 1/2" or 3/4" NPS pendant (*pendant by others*) and surface mount capability for install versatility.

Intelligence built in.

Every PORTO comes standard with integrated daylight sensing that ensures the fixture is on when it's needed and off when it's not, providing both safety and efficiency. Optional Lightcloud or Lightcloud Blue control and sensing puts smart features at your fingertips so you can leave the ladder behind!
