

Selectable CCT gives you 5 downlights in 1! Recessed and gimbal retrofits with field adjustability.

Economy that performs.

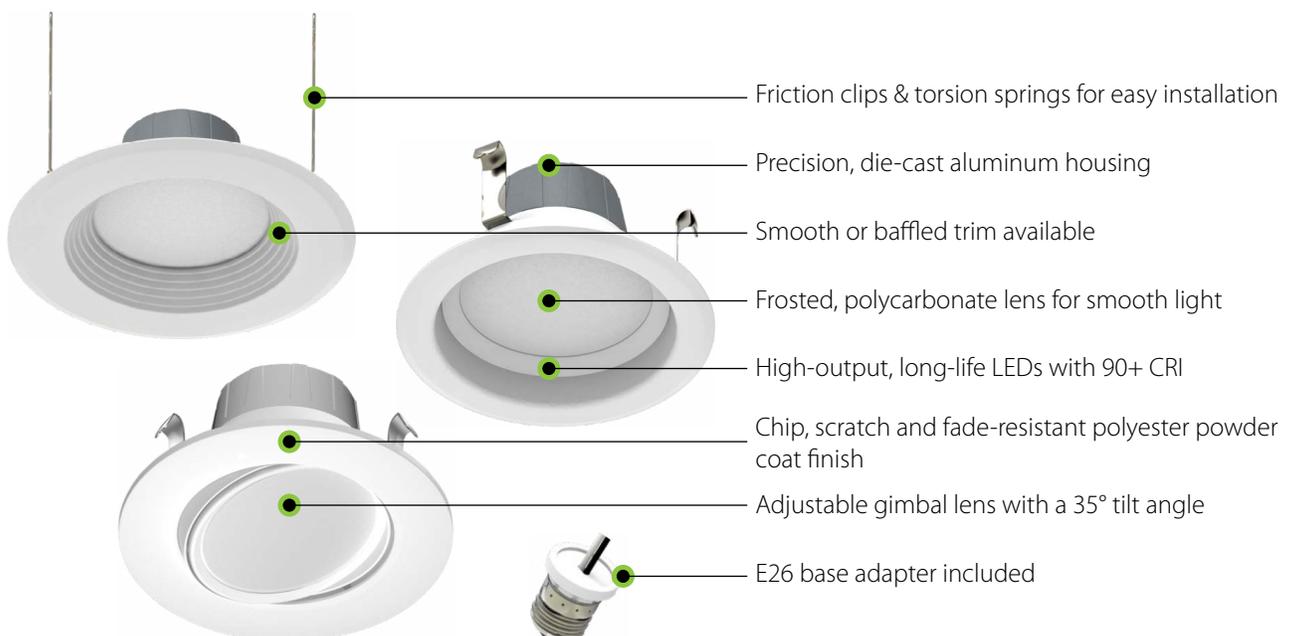

A frosted lens creates smooth, uniform light that reduces glare without sacrificing lumen output, and 90+ CRI ensures accurate color rendering (California Title 20 and JA8 compliant). All models are dimmable to 10% with most standard TRIAC dimmers (120V).

You are in control.

These field-adjustable downlights allow you to change color temperature with the flick of a switch! They're ideal for both new construction and retrofit applications. Models are offered in both 4" and 6", with either smooth or baffled trims. Gimbal models come in both 4" and 6" models with an adjustable lens that can tilt up to 35 degrees.

We make it easy.

Our low-profile design makes them compatible with most recessed housings, and installation is quick and easy, with friction clips for 4" cans, and torsion springs for 5"/6" cans. All models also include an Edison base adapter. All models are suitable for use in dry, damp and wet locations, making them perfect for both indoor and outdoor use.

Stock up on cans.

RAB carries 4" and 6" recessed housings in both new construction and remodeler models. All housings are IC rated for direct contact with insulation, and compatible with our retrofit downlights.
